REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Applicant argues at page 9 of the reply filed 01 June 2007 that Larson (US 4602466) does not teach or suggest using its metal guides as a support for the upper boards. The examiner agrees. Jones (US 4043719) places a flexible top sheet on blocks 56 (Fig. 2) in order to confine the foam (col. 2, lines 53-57), but Jones does not teach or suggest supporting the sheet with the blocks. Furthermore, Jones uses heavy paper, foil, roofing felt or other flexible sheets (col. 3, lines 1-10) and therefore it does not appear that the blocks 56 would support the sheet. Regarding claim 32, in combination with the claimed limitations, the examiner does not find motivation in the prior art of record to arrive at the claimed limitation of the conveying system comprising a pair of stationary support rails to keep the upper boards at a desired height and placement above the respective lower boards. Regarding claim 1, in combination with the claimed limitations, the examiner does not find motivation in the prior art of record to perform the claimed step of buttresses positively driving the upper boards along the pair of stationary support rails at a complementary position over the respective lower boards. In particular, Larson does not teach or suggest the claimed buttresses, and buttresses which positively drive the upper boards along the pair of stationary support rails would appear to interfere with the operation of Larson's opposed conveyers 32 and 70 (Fig. 2). **Art Unit: 1733**

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
